City of Chowchilla — Access Compliance Survey Report - Curb Ramps — **11TH ST**

Year Completed	Intersection ID	Survey Street	Cross Street
TBD	13	11th St	Lake Ave

Orientation & ID #	Ramp Type	Existing Access Barrier and Proposed Solution	Codes / Mitigation Info	Measurements
E	Parallel	309 Detectable Warning Surface	CBC 2016 11B-705.1.2.2 ADAAG 4.7.7, 4.29.1&2 ADA-2010 705.1	

- *As-Built Description:*
  The detectable warning surface is not located between 6" - 8" from the curb line on a curb ramp or at the edges on a pedestrian island, cut-through island, pedestrian pad, perpendicular curb ramp or blended transition. (0" from curb line on a parallel curb ramp.)
- *As-is* 6.0"
- *Proposed Solution:*
  Relocate the detectable warning surface.

Unit Cost **$500.00**

Priority **TBD**

		LEFT	RIGHT
Width of Ramp / Pad	(in)	67.0	66.0
Length of Ramp / Pad	(in)	85.0	99.0
Slope of the Ramp / Pad	(%)	6.4	6.5
X Slope of the Ramp / Pad	(%)	1.1	0.6
Top Landing Length	(in)	48.0	48.0
Top Landing Slope	(%)	**3.0**	1.5
Top Landing X Slope	(%)	0.3	0.8

Bottom Landing Length	(in)	60.0
Bottom Landing Slope	(%)	0.0
Bottom Landing X Slope	(%)	0.1
Gutter Slope	(%)	4.3
Gutter XSlope	(%)	0.1
Gutter Lip	(in)	0.0
Truncated Domes	(y/n)	YES
Dome Setback	(in)	**6.0**

Street Grade (Left / Right)	(%)	2.7	0.3
Stop/Yield Control:	(y/n)	No	
Within Crosswalk	(y/n)	YES	
Crosswalks Served:		1 X-walk	
Tee Intersection:	(y/n)	Yes	
Vertical Curb:		Vertical	

1. **Orientation:** Corresponds to the specific corner/curb ramp in any given intersection, unique to each corner/curb ramp (in some cases there is more than one curb ramp per corner, or no curb ramp):
2. **Locator Number:** Corresponds to a unique database record tied to the specific curb ramp which can be crossreferenced across this data-base and its corresponding GIS database.
   - NW, SW, SE, and NE are the most commonly used directions;
   - NNE, ENE, ESE, SSE, SSW, WSW, WNW, and NNW identify individual curb ramps in situations involving multiple curbs ramps at one corner.
3. **Ramp Type:** Identifies the type of curb ramp (parallel, perpendicular, curb ramp required, etc.).
4. **Specific Item:** Category of accessible feature in which the barrier belongs.
5. **Survey Street:** Survey street name.
6. **Field Condition:** Description of as-built barrier based on applicable accessibility codes.
7. **Measurement:** Existing condition/dimension featured on the ramp measured as the most severe barrier on the particular ramp.
8. **Proposed Solution:** Description of steps necessary to remove barrier and, if applicable, an interim solution or notes.
9. **Cross Street:** Cross/intersecting street name.
10. **Codes / Info:**
    - PROWAG: Guidelines to enforce Federal accessibility standards in the public rights-of-way.
    - ADAAG/ADA 2010: The Federal Standard for accessibility adopted by the Department of Justice.
    - CBC 2007/ CBC 2016 The California Building Codes.
11. **Unit Cost:** Estimated cost specific solution per one unit. (The final cost of barrier removal may exceed this estimate based on the year of mitigation, design approach and chosen method of mitigation)
12. **Priority:** Priority number assigned to specific barrier based on priorization criteria which include: expected frequency of use and severity of the barrier. Measureed on a scale of 0 to 200, with 200 being the highest priority and 0 being the least.
13. **Ramp Features:** Features of curb ramp measured to determine accessibility.
14. **Measurements:** Existing condition/dimension determined for each ramp.
    - (in) measurement in inches
    - (%) measurement in percentage grade
    - **BOLD** text indicate non-compliant dimensions.
    - Normal text indicate compliant dimensions

LEGEND ABBREVIATIONS

ADA	Americans with Disabilities Act
ADAAG	ADA Accessibility Guidelines
E	East
Fig.	Figure
JOB	per one job (lump sum)
lbs.	Pounds
LF	Linear foot
MUTCD	Manual on Uniform Traffic Control Devices
N	North
NE	Northeast
NW	Northwest
NWn	Northwest: North side
NWs	Northwest: South side
POT	Path of travel
PROW	Public Right-of-Way
PROWAG	Public Right-of-Way Accesible Guidelines
Qty	Quantity
REF	Reference; Provided in locations with overlapping issue; indicates no addition cost required for mitigation
S	South
SE	Southeast
SF	Square foot
SW	Southwest
TBD	To be determined
W	West

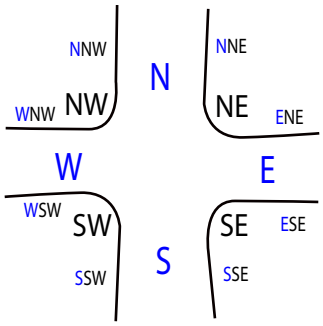

Figure 1. Orientation map corresponding to the specific cornner/curb ramp in any given intersection.

MEASUREMENT BREAKDOWN

FEATURE:	ADA/CBC GUIDELINE
Street Grade	*Used for reference in regards to possible exceptions*
Width of Ramp	The clear width of curb ramp runs (excluding any flared sides), blended transitions, and turning spaces shall be 48 inches minimum.
Slope of the Ramp	Ramp runs shall have a running slope not steeper than 1:12 (8.3%).
X Slope of the Ramp	The cross slope of curb ramps and blended transitions shall be 1:48 (2.0%) maximum.
Top Landing Length	Landings shall be provided at the tops of curb ramps and blended transitions. The landing clear length shall be 48 inches minimum.
Top Landing Slope	The slope of the landing in all directions shall be 1:48 (2.0%) maximum.
Top Landing X Slope	The slope of the landing in all directions shall be 1:48 (2.0%) maximum.
Bottom Landing Length	(Parallel Curb Ramp) A turning space 48 inches minimum by 48 inches minimum shall be provided at the bottom of the curb ramp.
Bottom Landing Slope	(Parallel Curb Ramp) The slope of the turning space in all directions shall be 1:48 (2.0%) maximum.
Bottom Landing X Slope	(Parallel Curb Ramp) The slope of the turning space in all directions shall be 1:48 (2.0%) maximum.
Left Flare	Where provided, curb ramp flares shall not be steeper than 1:10 (10.0%).
Right Flare	Where provided, curb ramp flares shall not be steeper than 1:10 (10.0%).
Gutter Lip	The adjacent surfaces at transitions at curb ramps to walks, gutters, and streets shall be at the same level.
Gutter Slope	Counter slopes of adjoining gutters and road surfaces immediately adjacent to and within 24 inches of the curb ramp shall not be steeper than 1:20 (5.0%).
Gutter X Slope	The cross slope of curb ramps and blended transitions shall be 1:48 (2.0%) maximum.
Truncated Domes	Curb ramps and blended transitions shall have detectable warnings.
Dome Setback	Detectable warnings shall be located so the edge nearest the curb is 6 inches minimum and 8 inches maximum from the line at the face of the curb marking the transition between the curb and the gutter, street or highway or flush at the transition for a paralell curb ramp and island cut-through.
Within Crosswalk	The bottom of curb ramps shall have a clear space 48 inches minimum outside active traffic lanes of the roadway
Viewpoint	The curb ramp left/right orientation is viewed as if standing in the street facing the curb ramp.

COST SUMMARY

Total Cost for Street: 10th St — $107,500.00

Intersection ID and Street Names:	Type:	Orientation:	
1 10th St and Kings Ave			**$14,000.00**
272	Curb Ramp Required	E	$7,000.00
275	Curb Ramp Required	N	$7,000.00
273	No Sidewalk, Curb Ramp Not Required	S	$0.00
274	No Sidewalk, Curb Ramp Not Required	W	$0.00
2 10th St and Lake Ave			**$3,000.00**
280	Perpendicular	E	$0.00
283	Perpendicular	N	$0.00

1021 Gutter

- *As-Built Description:*

The slope of the gutter area or street at the foot of a curb ramp, blended transition, pedestrian pad, or island cut through exceeds 1:20 (5%) in the direction of the pedestrian crossing.

- *As-is* 12.7%
- *Proposed Solution:*

Demolish gutter or street area as required and provide 48" x 48" area at foot of curb ramp, blended transition, pedestrian pad, or island cut through with slope no greater than 5%.

N No Sidewalk, Curb Ramp Not Required

415 Pedestrian Access Route

- *As-Built Description:*

No curb, curb ramp, or sidewalk provided. Pedestrian access route is along the vehicular lane and is not separated by a curb or other cane detectable warning.

- *Proposed Solution:*

When curb or sidewalk is installed along either street, provide accessible curb ramp.

CBC 2007 **1127B.5.1**

PROWAG **R305.1**

• *As-Built Description:*

Detectable warning surface not provided where a curb ramp, landing, blended transition, pedestrian pad, or island cut through connects to a street.

• *Proposed Solution:*

Install a truncated dome surface that extends the full width and depth (36" min.) of the curb ramp, landing, blended transition, pedestrian pad, or island cut through excluding the flared sides, inside the grooved border.

Unit Cost **$2500.00**

Priority

63

N Curb Ramp Required

121 Access Route

- *As-Built Description:*
  Curb ramp or blended transition not provided where a pedestrian access route crosses a curb.
- *Proposed Solution:*
  Provide a parallel curb ramp, including detectable warning surfaces, and top and bottom landings as required.

CBC 2007 **1127B.5.1**
ADAAG **4.7.1**
PROWAG **R207.1**

S Parallel

186 Detectable Warning Surface

CBC 2016 **11B-705.1.2.2**
ADAAG **4.7.7, 4.29.1&2**
ADA-2010 **705.1**

Unit Cost **$500.00**

Priority
76

- *As-Built Description:*

The detectable warning surface is not located between 6" - 8" from the curb line on a curb ramp or at the edges on a pedestrian island, cut-through island, pedestrian pad, perpendicular curb ramp or blended transition. (0" from curb line on a parallel curb ramp.)

- *As-is* 6.0"
- *Proposed Solution:*

Relocate the detectable warning surface.

204 Detectable Warning Surface

- *As-Built Description:*
  The detectable warning surface is not located between 6" - 8" from the curb line on a curb ramp or at the edges on a pedestrian island, cut-through island, pedestrian pad, perpendicular curb ramp or blended transition. (0" from curb line on a parallel curb ramp.)
- *As-is* 6.0"
- *Proposed Solution:*
  Relocate the detectable warning surface.

CBC 2016 **11B-705.1.2.2**

S Island-Cut Through

577 Islands

CBC 2016 **11B-406.6**

Unit Cost **$10000.00**

Priority **18**

- *As-Built Description:*

Raised islands in crossings shall be cut through level with the street or have curb ramps at both sides. The clear width of the accessible route at island cut-throughs or island perpendiculars shall be 60 inches (1524 mm) wide minimum.

- *As-is* 48.0"
- *Proposed Solution:*

Demolish and provide a 60" minimum wide walkway at the cut-through, refuge island, island perpendicular, or median.

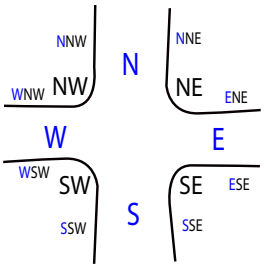
Clear Floor Space	(y/n)	Less
Clear Floor Slope	(%)	0.3
Clear Floor X Slope	(%)	**2.8**
Button Ht.	(in)	45.5
Button Reach	(in)	0.0
Button Diameter	(in)	2.0
Button Pressure	(lbs)	0.0
Closed Fist Operation	(y/n)	Yes
Visual Contrast	(y/n)	Yes
Contrasting Color Bands	(y/n)	**No**
Vibrotactile Feedback	(y/n)	**No**
Audible Walk Indicator	(y/n)	**No**
Button Locator Tone	(y/n)	**No**
Tactile Arrow	(y/n)	**No**
Within 5 ft from crosswalk	(y/n)	Yes
1.5 - 6.0 ft from curb	(y/n)	Yes
10 ft minimum separation		**>10ft**

- *Additional Items:*

Provide 2" wide color coding with 1" wide dark borders located directly above control button. Provide a tactile arrow aligned parallel to the crosswalk direction on the sign. Provide voice or tone audible indication of the WALK interval at the pedestrian signal device. Integrate the vibrotactile signal device with the pedestrian pushbutton. Provide a button locator tone.



1. **Locator Number:** Corresponds to a unique database record tied to the specific pedestrian signal which can be crossreferenced across this database and its corresponding FileMaker Pro and GIS databases.
2. **Orientation:** Corresponds to the specific corner/pedestrian signal in any given intersection, unique to each corner:
   - NW, SW, SE, and NE are the most commonly used directions;
   - NNE, ENE, ESE, SSE, SSW, WSW, WNW, and NNW identify individual pedestrian signal system in situations involving multiple signal systems at one corner;
   - I-NW, I-NE, I-SW, I-SE, etc, identify pedestrian signal systems located on medians and pedestrian refuge island.
3. **Survey Street:** Survey street name.
4. **As-Built Description:** Description of as-built barrier based on applicable accessibility codes.
5. **As-is Measurement:** Existing condition/dimension featured on the signal system measured as the most severe barrier on the particular signal.
6. **Proposed Solution:** Description of steps necessary to remove barrier and, if applicable, an interim solution or notes.
7. **Cross Street :** Cross/intersecting street name.
8. **Codes / Info:**
   - PROWAG: Guidelines to enforce Federal accessibility standards in the public rights-of-way.
   - ADAAG/ADA 2010: The Federal Standard for accessibility adopted by the Department of Justice.
   - MUTCD The FHWA standards for traffic signs, road surface markings, and signals.
   - CBC 2016 California Building Code
9. **Unit Cost:** Estimated cost specific solution per one unit. (The final cost of barrier removal may exceed this estimate based on the year of mitigation, design approach and chosen method of mitigation)
10. **Priority:** Priority number assigned to specific barrier based on priorization criteria which include: expected frequency of use and severity of the barrier. Measureed on a scale of 0 to 200, with 200 being the highest priority and 0 being the least.
11. **Ped. Signal Features:** Features of the pedestrian signal system measured to determine accessibility.
12. **Measurements:** Existing condition/dimension determined for each pedestrian signal system.
    - (in) measurement in inches
    - (%) measurement in percentage grade
    - **BOLD** text indicate non-compliant dimensions.
    - Normal text indicate compliant dimensions

- *As-Built Description:*

  The slope of the floor or ground surface at the pedestrian signal device exceed 1:48 (2%).

- *As-is Measurement:* 4.7%

- *Proposed Solution:*

  Modify or repave the ground surface as necessary to provide slope (s) not exceeding the required 1:48 (2%) maximum in any direction.

Unit Cost **$7950.00**

Priority

88.875

- *Additional Items:*

Remount push button to between 42" min. and 48" max. height to center of button. Provide 2" wide color coding with 1" wide dark borders located directly above control button. Provide a tactile arrow aligned parallel to the crosswalk direction on the sign. Provide voice or tone audible indication of the WALK interval at the pedestrian signal device. Integrate the vibrotactile signal device with the pedestrian pushbutton. Provide a button locator tone.

- *As-Built Description:*

The cross slope of the floor or ground surface at the pedestrian signal device exceed 1:48 (2%).

- *As-is Measurement:* 3.5%
- *Proposed Solution:*

Modify or repave the ground surface as necessary to provide slope (s) not exceeding the required 1:48 (2%) maximum in any direction.

- *Additional Items:*

Remount push button to between 42" min. and 48" max. height to center of button. Provide 2" wide color coding with 1" wide dark borders located directly above control button.

iv. Priority Score

Definitions

Access Compliance Survey – Process taken to fulfill the requirements of a Transition Plan, by surveying and identifying physical barriers which impede accessibility to a program or service provided to the public.

Activity Score – Rating that summarizes a feature's expected frequency of use and its impact on individuals with disabilities.

Barrier Score – Rating that summarizes the severity of a feature relative to its deviation from current State and Federal Standards.

Curb Ramp – A ramp graded down from the top surface of a sidewalk to the surface of an adjoining street to provide connectivity within the Public Rights-of-Way.

Facility – A place housing a program or service for the public.

Feature – An element provided in the Public Rights-of-Way, including public sidewalks and streets, crosswalks, curb ramps, street furnishings, pedestrian signals, parking, etc. The four main features surveyed are 1) sidewalks, including gaps, 2) curb ramps, 3) pedestrian signals, and 4) bus stops.

Pedestrian Signal – Devices used at signalized intersections to notify pedestrians when it is safe to cross the street.

Priority Score – Rating that is the summation of both Activity Score and Barrier Score. This rating is used as criteria for determining barrier mitigation schedules that are a requirement of a Transition Plan.

PROW – *Refer to definition of "Public Rights-of-Way (PROW)"*

Public Rights-of-Way (PROW) – Public infrastructure such as streets, roads, or walkways under the responsibility or authority of a public entity, such as a City or County.

Self-Evaluation – A review of a public entity's policies, procedures, and practices in meeting the programmatic requirements of Title II of the Americans with Disabilities Act. The findings of the review and the modifications made as a result must be compiled and shall be made available for public inspection.

Title I – Regulations from the Americans with Disabilities Act specific to employment.

Title II – Regulations from the Americans with Disabilities Act specific to State and local government entities, including City and County governments.

Title III – Regulations from the Americans with Disabilities Act specific to areas of public accommodations and commercial facilities.

Transition Plan - A living document that inventories the physical barriers identified which impede accessibility to a public entity's programs and services. The document will identify solutions to mitigate the barriers and set forth the steps necessary to achieve compliance via a timeline or schedule and designate an official responsible to maintain and update the document. The document is a requirement of the Americans with Disabilities Act and shall be made current and available for public inspection.

Activity Score

An Activity Score is a rating that summarizes a feature's (sidewalk (including gaps), curb ramp, pedestrian signal or bus stop) expected frequency of use and its impact on individuals with disabilities in the Public Rights-of-Way. A rating is assigned to a feature based on that feature's location in proximity to several categories.

In total, the Activity Score is scored on a scale of 0 to 100, with 0 being the lowest activity, and 100 being the highest activity. An Activity Score of 0 indicates that the feature is not expected to see any use by pedestrians based on its location. An Activity Score of 100 indicates that the feature is expected to see significant use by pedestrians due to its location.

The following categories are used to rate an Activity Score for each feature in the Public Rights-of-Way:

Table 1: Activity Score Category Breakdown

Category	Sub-Category	Specifications	Weight	Value	Score
Streets	Arterial	Adjacent Arterial Street	10	100%	10
	Collector	Adjacent Collector Street		50%	5
Transit Stops	All forms of Public Transit	Within 1/4 Mile of a Transit Stop	10	100%	10
Schools	Elementary School (Primary Education)	Within 1/4 Mile of Primary Education	12	100%	12
	Middle/Intermediate or High School (Secondary Education)	Within 1/2 Mile of Secondary Education		100%	
Parks	All Parks within the City	Within 1/4 Mile of a Park	10	100%	10
City Attractors	Downtown	Within 1/4 Mile of Downtown Area	12	100%	12
	City-Owned Buildings	Within 1/4 Mile of City Buildings		50%	6
Pedestrian Generators	Senior Center	Within 1/4 Mile of a Senior Center	12	100%	12
	Medical or Social Services	Within 1/4 Mile of Medical or Social Services		50%	6
Population Density*	Population per Square Mile in each Census Block, as delineated by the U.S. Census. *Categorized in GIS according to 4 Manual Intervals of 0%, 30%, 60%, and 100%	No Population	12	0%	0
		> 0%-30%		30%	4
		> 30%-60%		60%	8
		> 60%-100%		100%	12
Senior Population Density*	Population Age 65 abd Older per Square Mile in each Census Block, as delineated by the U.S. Census. *Categorized in GIS according to 4 Manual Intervals of 0%, 30%, 60%, and 100%	No Population	12	0%	0
		> 0%-30%		30%	4
		> 30%-60%		60%	8
		> 60%-100%		100%	12
No Sidewalk	Adjacent to an Incorporated Street without Sidewalks	A sidewalk, curb ramp, or pedestrian signals that is adjacent to a street without sidewalks.	10	100%	10
		Total Weight	**100**		

Barrier Score

A Barrier Score is a rating assigned to a feature (sidewalk (including gaps), curb ramp, pedestrian signal, or bus stops) in the Public Rights-of-Way based on the severity of the feature's existing conditions in comparison to current State and Federal Standards.

In total, the Barrier Score is scored on a scale of 0 to 100, with 0 being a feature that is compliant with current State and Federal Standards, and 100 indicating that the feature is completely noncompliant. All gaps along sidewalks and curb ramps that are required to be installed where there are none currently will be given a score of 100 to classify that they are the highest priority.

Categories used to rate a Barrier Score for each feature in the Public Rights-of-Way are specific to the feature being surveyed (sidewalk (including gaps), curb ramp, pedestrian signal, or bus stops).

The following categories are used to rate a Barrier Score for Sidewalks:

Table 2: Barrier Score Category Breakdown for Sidewalks

Category	Barrier Type	Weight	Quantity**	Value	Score
Heaving/Change in Level	Minor Change in Level (0.26"-0.74")	10	1-2 Incidents	30%	3
			3-5 Incidents	60%	6
			6+ Incidents	100%	10
	Major Change in Level (0.75" or greater)	20	1-2 Incidents	30%	6
			3-5 Incidents	60%	12
			6+ Incidents	100%	20
Cross Slope	Cross Slope Low (2%-5%)	10	10' or less	50%	5
			>10'	100%	10
	Cross Slope Medium (5%-8%)	15	10' or less	50%	7.5
			>10'	100%	15
	Cross Slope High (>8%)	20	10' or less	50%	10
			>10'	100%	20
Run Slope*	Running Slope Low (5%-8%)	2.5	10' or less	50%	1.25
			>10'	100%	2.5
	Running Slope Medium (8%-11%)	5	10' or less	50%	2.5
			>10'	100%	5
	Running Slope High (>11%)	7.5	10' or less	50%	3.75
			>10'	100%	7.5
Obstructions	Obstructions	10	1-2 Incident	50%	5
			3+ Incidents	100%	10
	Total Weight	100			

*Running Slope that matches street grade or less is considered compliant and therefore should receive a score of 0. Any running slope longer than 10 feet is assumed to match the street grade.

** Incidents are the barrier count along a run. For slope data it is the length of the category for the run. A run is usually from one intersection to the next, however a run could end mid-block depending on several factors.

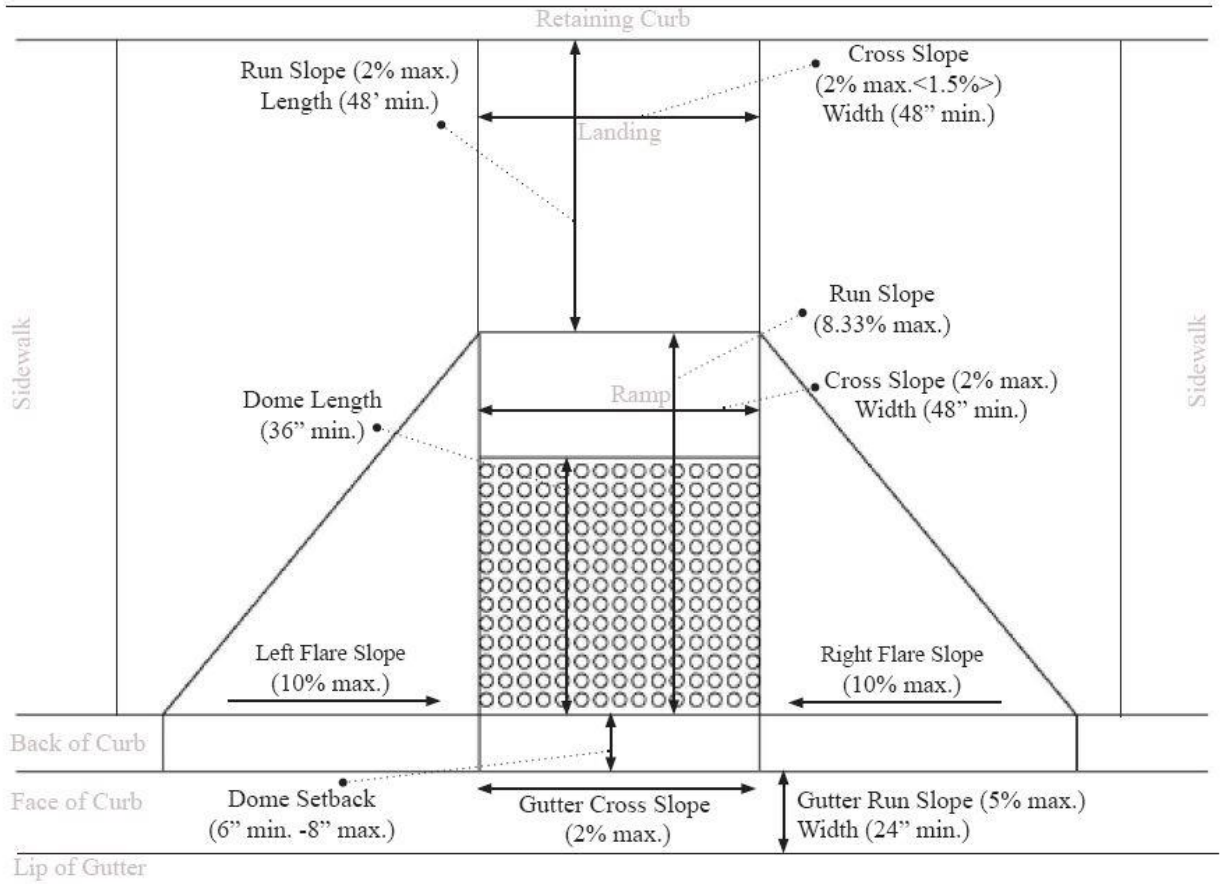

Figure 1: Curb Ramp Measurements and Components Diagram (Perpendicular)

The following categories are used to rate a Barrier Score for Curb Ramps (Perpendicular):

Table 3: Barrier Score Category Breakdown for Curb Ramps (Perpendicular)

Barrier Type	Weight	Category	Value	Score
Width of Ramp	6	≤ 35.9"	100%	6
		36.0" - 41.9"	50%	3
		42.0" - 47.5"	25%	1.5
		≥ 48"	0%	0
Alignment with Marked Crosswalk	2	No	100%	2
		Yes	0%	0
Slope of Ramp	10	≥ 15%	100%	10
		12.5% -14.9%	75%	7.5
		10.0% - 12.4%	50%	5
		8.4% - 9.9%	25%	2.5
		≤ 8.3%	0%	0
Cross Slope of Ramp	10	≥ 7.0%	100%	10
		5.0% - 6.9%	75%	7.5
		2.9% - 4.9%	50%	5
		2.1% - 2.8%	25%	2.5
		≤ 2.0%	0%	0
Top Landing Running Slope	5	≥ 9.0%	100%	5
		5.0% - 8.9%	75%	3.75
		2.9% - 4.9%	50%	2.5
		2.1% - 2.8%	25%	1.25
		≤ 2.0%	0%	0
Top Landing Cross Slope	10	≥ 9.0%	100%	10
		5.0% - 8.9%	75%	7.5

Priority Score

The Priority Score is a summation of both a feature's Activity Score and Barrier Score and is used as a criterion in planning out schedules for the order of barrier mitigation work.

Activity Score + Barrier Score = Priority Score

The Priority Score is rated on a scale of 0 to 200, with 0 being a feature that should have no priority for barrier mitigation work and 200 being a feature which should be at the forefront of any planned barrier mitigation work that uses funds dedicated solely for mitigating accessibility barriers identified in an ADA Transition Plan.

The Priority Score is designed to be equal in scale across the four primary features surveyed in the PROW (sidewalks, curb ramps, pedestrian signals, and bus stops), i.e. a Priority Score of 200 given to a curb ramp is equal to a Priority Score of 200 given to a sidewalk.

Note that the Priority Score serves as only one methodology for creating a schedule. Other methods and criteria can be used (and is encouraged) as the basis for forming a schedule including: 1) barriers identified by constituents through a special request, 2) barriers that overlap with a project already funded and scheduled, 3) barriers that can be resolved internally with maintenance staff, 4) grouping work geographically for cost efficiency, 5) etc.

Documentation for any additional methodology should be kept on record for justifying a barrier mitigation schedule.

APPENDIX F: PRIORITIZATION CRITERIA FOR BARRIER MITIGATION – FACILITIES

Table of Contents

i. **Definitions**

ii. **Priority Score**
Table 1: Priority Score Breakdown

iii. **Severity Score**

Definitions

Access Compliance Survey – Process taken to fulfill the requirements of a Transition Plan, by surveying and identifying physical barriers which impede accessibility to a program or service provided to the public.

Curb Ramp – A ramp graded down from the top surface of a sidewalk to the surface of an adjoining street to provide connectivity within the Public Rights-of-Way.

Facility – A place housing a program or service for the public.

Feature – An element provided in the Public Rights-of-Way, including public sidewalks and streets, crosswalks, curb ramps, street furnishings, pedestrian signals, parking, etc. The four main features surveyed are 1) sidewalks, 2) curb ramps, 3) pedestrian signals, and 4) bus stops

Pedestrian Signal – Devices used at signalized intersections to notify pedestrians when it is safe to cross the street.

PROW – *Refer to definition of "Public Rights-of-Way (PROW)"*

Public Rights-of-Way (PROW) – Public infrastructure such as streets, roads, or walkways under the responsibility or authority of a public entity, such as a City or County.

Self-Evaluation – A review of a public entity's policies, procedures, and practices in meeting the programmatic requirements of Title II of the Americans with Disabilities Act. The findings of the review and the modifications made as a result must be compiled and shall be made available for public inspection.

Title I – Regulations from the Americans with Disabilities Act specific to employment.

Title II – Regulations from the Americans with Disabilities Act specific to State and local government entities, including City and County governments.

Title III – Regulations from the Americans with Disabilities Act specific to areas of public accommodations and commercial facilities.

Transition Plan - A living document that inventories the physical barriers identified which impede accessibility to a public entity's programs and services. The document will identify solutions to mitigate the barriers and set forth the steps necessary to achieve compliance via a timeline or schedule, and designate an official responsible to maintain and update the document. The document is a requirement of the Americans with Disabilities Act and shall be made current and available for public inspection.

Priority Score

A Priority Score is a rating that rates the relative importance of addressing a barrier according to its impact upon the disabled population. The score considers the expected frequency of use and frequency of contact that the barrier will have with the public based on its location within a facility and where the public have access to.

The Priority Score is rated on a score ranging from 1 to 4, 1 being the highest priority, which are barriers that are expected to be in contact with the public consistently, and 4 being the lowest priority, which are barriers with minimal contact by the public. The scoring for the Priority Score is based on the following:

Table 1: Priority Score Breakdown

Priority 1	**Areas of basic public access**
	Accessible routes from site entry points to an accessible building entrance of the program location (EX. walks, ramps, accessible parking spaces, curb ramps, crosswalks at vehicular ways, passenger loading zones, etc.)
	Accessible route from accessible building entrances to “first contact points” (EX. information counters, public lobbies, elevators)
Priority 2	**Access to critical spaces of program function**
	(EX. Classrooms, assembly areas, meeting rooms, public offices, etc.)
Priority 3	**Access to public common areas that support program functions**
	(EX. Restrooms, drinking fountains, public telephones, etc.)
Priority 4	**Staff only areas not expected to be accessed by the public**

Severity Score

A Severity Score is a rating of the degree of deviation that the existing barrier has in comparison to applicable standards and the reparability of mitigating the barrier.

The Severity Score is rated on a score ranging from 1 to 4, 1 being the highest severity, and 4 being the lowest severity. Severity Scores are assigned on a case-by-case basis depending on the type of barrier and the most cost-effective solution to mitigate the barrier.

APPENDIX G: UNIVERSAL DESIGN ELEMENTS AND GUIDELINES

City of Chowchilla Self-Evaluation &Transition Plan

Sally Swanson Architects, Inc. (SSA) is honored to present this Universal Access Guidelines Manual to the City of Chowchilla for review and comment. Evidenced through its efforts, the City of Chowchilla is profoundly committed to furthering Universal Design (UD) and encourages its architects, product designers and environmental design researchers to integrate UD concepts into their work.

The Universal Access Guidelines Manual is not an Access Compliance Manual. While much has been written about Universal Design (UD), it is often equated with Access Compliance; the two concepts are, however, very different. The purpose of accessibility laws is to eliminate barriers in the built environment for use by persons with disabilities. UD, on the other hand, provides improved usability and safety for all members of the community. The goal of UD is to extend the benefits of accessible design to everyone and recognize that improved usability enhances the value of the built environment for all users.

Universal Design Elements

The guidelines concisely present the most common Universal Design (UD) elements and will provide the basis for implementing UD standards across all City facilities. The eight (8) elements of Universal Design are presented here, in the following format: name of the elements and definition/key factors of the elements. (Note: all elements may not be relevant to all design and should be reviewed on a case-by-case basis to select an appropriate UD methodology.)

ELEMENT ONE: Body Fit

- Accommodates a wide range of body sizes and abilities
- Supports various sizes and functions of the body
- Addresses differences in space clearances needed to accomplish tasks, including space for assistive devices
- Supports differences in fields of view

ELEMENT TWO: Comfort

- Supports desirable limits of body function and perception
- Addresses a user's ability to exert initial force, repetitive motion, and/or stamina
- Considers reaction and response time

- Supports maintenance of thermal equilibrium

ELEMENT THREE: Awareness

- Addresses differences in perceptual abilities
- Provides fail-safe features to protect against errors and mistakes
- Supports compatibility with assistive devices (e.g. hearing aids, white canes)
- Addresses the desired level of sound compared to the level of background noise

ELEMENT FOUR: Understanding

- Addresses complexity in operations or information
- Prioritizes information needed for implementation of actions
- Communicates safety and risk features
- Focuses on literacy and language skills

ELEMENT FIVE: Wellness

- Provides proper hygiene in areas associated with risk of contamination
- Provides for rapid assistance in an emergency; protection from safety/security risk
- Supports choices for active and healthy living
- Protects from environmental hazards

ELEMENT SIX: Social Integration

- Equally accessible by everyone
- Individual's use of a building shall be the same (e.g. providing accessible entries to buildings)
- Shall not isolate or stigmatize any user; supports cultural attitudes and values
- Shall not privilege one group over another
- Options for multiple languages are provided

ELEMENT SEVEN: Personalization

- Supports the provision of choices and alternatives
- Addresses user control over the environment
- Supports user independence to minimize inconvenience
- Control over exposure and personal information

ELEMENT EIGHT: Contextual Appropriateness

- Supports valued traditions and culturally based interpretations
- Fits within and/or improves upon the local physical context

- Acknowledges diversity and ensures usability by all
- Provides adequate space necessary to enable equal use

Universal Design Guidelines

This section provides general guidelines designed to expand the usability of City buildings, its site, and amenities. These guidelines will shape the planning, design and management of facilities accessibility for all users. The following approaches in adopting appropriate Universal Design for the City's facilities is recommended:

a. Develop an appropriate methodology to encourage the involvement of the City project team to accelerate the interest and adoption of the Universal Design Guidelines in the development of buildings and spaces.

b. Selecting Sample Cases from existing access surveys for the development of Universal Design Guidelines:

1. The first part of the project will sum up the City project team's findings in terms of the incorporation of the Americans with Disabilities Act Accessibility Guidelines (ADAAG) on the selected Sample Cases.

    - Review and evaluate status of current ADA related documents and studies, written and electronic documents and reports, including Transition plans. Address buildings, site, POT's, nodes of accessibility.

    - Take into consideration all construction work that has been performed on site but was not represented in the documents.

2. The second part of the project will assess the Sample Cases in terms of the incorporation of the eight (8) elements of Universal Design; recommend specific approach to Universal Access Guidelines for the structures on site and take into consideration:

SITE ELEMENTS

- Site Entrances and Exits
- Site Circulation
- Transit and Parking

- Building Relationships
- Outdoor Amenities

BUILDING ELEMENTS

- Building Entrances and Exits
- Building Circulation Systems
- Space Relationships
- Assembly Spaces
- Restrooms
- Bookstore Product Displays
- Information Transaction Kiosks
- Workstations
- Indoor Amenities
- Food Service Facilities

SUPPORT AND EDUCATIONAL SERVICES

- Educational Service Areas
- City Web Presence
- Telephone Service
- Access to Instructional Material

FACILITIES MANAGEMENT

- Parking and Transit Policies
- Building Maintenance
- Life Safety and Evacuation Plan Recycling

3. The project will conclude with a rating of the Sample Cases in terms of their overall impact on the comfort and well-being of diverse users, and a proposal for specific guidelines relative to the Universal Design Principles that will complement existing accessibility standards by encouraging the incorporation of features that will increase usability, safety and health for a diverse end user population.
